### **EXPLANATORY NOTES**

### 1. BASIS OF PREPARATION

The unaudited condensed interim financial statements have been prepared in accordance with MFRS 134: Interim Financial Reporting issued by the Malaysian Accounting Standards Board ("MASB").

The unaudited condensed interim financial statements should be read in conjunction with the audited annual financial statements of the Group and of the Bank for the financial year ended 31 December 2019. The explanatory notes attached to the unaudited condensed interim financial statements provide an explanation of events and transactions that are significant to an understanding of the changes in the financial positions and performance of the Group and of the Bank since the financial year ended 31 December 2019.

The significant accounting policies and methods of computation applied in the unaudited condensed interim financial statements are consistent with those adopted in the most recent audited annual financial statements for the financial year ended 31 December 2019, except for the adoption of the following MFRS, Amendments to MFRSs, Annual Impovements to MFRSs and IC Interpretation, which are only applicable for financial periods beginning on or after 1 January 2020:

Amendments to MFRS 3 Definition of a Business Amendments to MFRS 101 and MFRS 108 Definition of Material Amendments to MFRS 9 and MFRS 139 and MFRS 7 Interest Rate Benchmark Reform The Conceptual Framework for Financial Reporting

### Effective for financial periods beginning on or after 1 January 2021

MFRS 17 Insurance Contracts

### Effective for financial periods to be determined by the MASB

Amendments to MFRS 10 and MFRS 128 Sale or Contribution of Assets between an Investor and its Associate or Joint Venture.

The Group and the Bank plan to adopt the above pronouncements when they become effective in the respective financial periods. The initial application of the abovementioned pronouncements is not expected to have any significant impact to the financial statements of the Group and of the Bank.

### MFRS9 Financial Instruments

The measurement of Expected Credit Loss (ECL) under MFRS9 across all categories of financial assets requires various inputs into the ECL models which can result in different levels of allowance. Elements of the ECL models that would require accounting judgements and estimates would include the Bank's internal grading model, the Bank's criteria for assessment of significant increase in credit rating (SICR) as well as the selection of forward-looking macroeconomic scenarios and their probability weightings. With the sudden onset of the Covid-19 outbreak and the evolving measures to counter the pandemic, judgement has been exercised based on information available on-hand in the determination of the Bank's ECL. As information is still limited and will likely be subject to high level of uncertainties, the Bank will continue to review and monitor closely and shall take appropriate and timely actions to address the situations.

### 2. AUDITORS' REPORT ON PRECEDING ANNUAL FINANCIAL STATEMENTS

The auditors' report on the audited annual financial statements for the financial year ended 31 December 2019 was not subject to any qualification.

#### **EXPLANATORY NOTES**

#### **18. DERIVATIVE FINANCIAL ASSETS/(LIABILITIES)**

Financial derivatives are instruments whose values change in response to the change in one or more "underlying", such as foreign exchange rate, security price and credit index. They include forwards, swaps, futures, options and credit derivatives. In the normal course of business, the Group and the Bank customise derivatives to meet specific needs of their customers. The Group and the Bank also transact in these derivatives for proprietary trading purposes as well as to manage its assets/liabilities and structural positions. While the Group and the Bank also enter into other foreign exchange forward contracts with the intention to reduce the foreign exchange risk of expected sales and purchases for customers, these other contracts are not designated as hedge relationships and are measured at fair value through profit or loss.

The fair values of the derivatives are as follows:

|                                 | Gi                        | oup and Bank           |                        |

The table above analyses the principal amounts and the positive and negative fair values of the Group's and the Bank's financial derivatives. The notional amounts of these instruments indicate the value of transactions outstanding at the reporting date for both trading and hedging instruments. They do not necessarily indicate the amount of future cash flows or the fair value of the derivatives and therefore, do not represent total amount of risk. The positive and negative fair values represent the favourable and unfavourable fair values respectively of hedging and trading derivatives as a result of fluctuations in the value of the underlying relative to their contractual terms as at reporting date.

#### 23. SUBORDINATED BONDS (cont'd)

(d) Fair value hedge

The Bank uses fair value hedge to protect changes in fair value of the Bond 2. The Bank primarily uses interest rate swap as hedge of interest rate risk.

As at 30 September 2020, the Bank had an interest rate swap agreement in place with notional amount of RM600 million (31 December 2019: RM600 million) for Bond 2.

For Bond 2, the Bank receives a fixed interest rate of 3.835% per annum and pays variable interests rate of 3-month KLIBOR on the notional amount.

The swap is being used to hedge exposure to changes in fair value of fixed rate of both bonds, which have a fixed rate.

The movements in fair value of the interest rate swap of unrealised loss of RM17,810,000 (31 December 2019: RM10,138,000 unrealised loss) are recognised in trading and investment income during the period. There is no ineffectiveness recognised for this hedge.

#### EXPLANATORY NOTES

#### **31. SEGMENT INFORMATION**

#### **Operating Segments**

The following segment information has been prepared in accordance with MFRS 8 *Operating Segments*, which defines the requirements for the disclosure of financial information of an entity's operating segments. It is prepared on the basis of the "management approach", which requires presentation of the segments on the basis of internal reports about the components of the entity which are regularly reviewed by the chief operating decision-maker in order to allocate resources to a segment and assess its performance. The Group's businesses are organised into the following four segments based on the types of products and services that it provides.

#### <u>Retail</u>

The Retail segment covers Personal Financial Services, Business and Private Banking. Personal Financial Services serves the individual customers, offers a wide range of products and services, including deposits, loans, credit and debit cards, insurance products, and also provides an extended range of financial services, including wealth management to wealthy and affluent customers. Private Banking is an integral part of the Group, dedicated to providing high-net-worth clients with financial and portfolio planning services. We are focused on helping our clients achieve sustainable growth and legacy solutions of their wealth for future generations via bespoke wealth management and credit advisory. Business Banking serves small enterprises, offers a range of products and services, including deposits, loans, trade, foreign exchange and insurance products.

#### Wholesale Banking ("WB")

The WB segment encompasses Commercial Banking, Corporate Banking, Financial Institutions Group ("FIG"), Multinational Corporates (MNC), Investment Banking and Transaction Banking. Commercial Banking serves the medium and large enterprises, while Corporate Banking serves large local corporations, government-linked companies and agencies. FIG serves financial institutions as well as non-bank financial institutions. Commercial Banking, Corporate Banking, MNC and FIG provide customers with a broad range of products and services that include current accounts, deposits, lending, trade finance, structured finance, cash management and crossborder payments. Investment Banking provides services that include principal advisor, lead manager and facility agent for the arrangement of both syndicated loans and Private Debt Securities. Transaction Banking provides trade finance and cash management services.

#### Global Markets ("GM")

The GM segment provides a comprehensive range of treasury products and services, including foreign exchange, money market, fixed income, derivatives, commodities, gold products, as well as an array of structured products. It is a player in Malaysian Ringgit treasury instruments in the region. It also engages in proprietary investment activities and management of excess liquidity and capital funds.

#### <u>Others</u>

Other segments include corporate support functions and decisions not attributable to business segments mentioned above and property-related activities.

#### 34. PERFORMANCE REVIEW

For the nine months ended 30 September 2020, the Group recorded a profit before taxation of RM1,022.6 million, a decrease of 14.7% or RM175.9 million compared to same period last year. The decrease was mainly due to higher impairment provision set aside for non-impaired assets.

Total operating income increased by 5.5% or RM124.0 million to RM2,377.3 million mainly from higher net interest income, other operating income and net income from Islamic Banking operations. Other operating income increased 2.1% or RM14.8 million to RM710.5 million mainly due to higher trading and investment income, partly offset by lower net foreign exchange gain and lower fee income.

Expenses increased by 1.5% or RM13.8 million to RM921.1 million driven by higher investment in information technology costs, partly offset by lower staff expenses.

Total allowance for expected credit losses increased by RM286.1 million mainly due to higher non-impaired expected credit loss on loans, advances and financing this year due to additional provision was set aside pre-emptively for non-impaired assets in view of Covid-19 impact, coupled with last year write-back of expected credit loss on commitments and contingencies.

#### EXPLANATORY NOTES

#### 35. PROSPECTS FOR 2020

Lingering risks related to the COVID-19 outbreak, trade disputes and geopolitical tensions are expected to weigh on global growth in the year ahead. The escalation of COVID-19 has heightened risks across major economies. From our perspective, the US, large parts of Europe and many other major economies are expected to be in contraction for 2020 while China will record a recessionary growth rate. Central banks and governments have responded aggressively to tackle the negative impact brought about by COVID-19.

We expect Malaysia's gross domestic product (GDP) to contract in 2020 in tandem with our expectations for negative global growth. The unprecedented outbreak of COVID-19 and the ensuing movement control order resulted in the steepest quarterly GDP decline on record in the second quarter, which was even steeper compared to the height of the Asian Financial Crisis. Economic activity has recovered from the trough in April this year with recent indicators signalling some improvement in labour market conditions, consumer spending, and trade activity. The government's fiscal stimulus packages, alongside monetary and financial measures, have also supported the economic recovery. However, the pace of recovery is uneven across sectors with some industries still operating below pre-pandemic levels. As such, the growth outlook remains subject to downside risks particularly from the uncertainties surrounding the spread of the pandemic domestically and globally. This uncertainty may weigh on household spending and business investments.

The overall impact on Malaysia's economy will depend on the duration and severity of the COVID-19 outbreak as well as policy responses from Malaysia's authorities and global policy responses. Malaysia has increased the fiscal package to RM305 billion or 21% of GDP to preserve the people's welfare and support businesses. In addition, the banking sector has committed to help households and businesses who require assistance once the moratorium ended on 30 September 2020. We expect the economy to recover once uncertainties related to COVID-19 abate. We remain optimistic that Malaysia's underlying strengths, including its strategic geographical location, significant natural resources, diversified economic structure, improved external position, favourable demographics, robust macro policies and resilient institutions will support the country's growth over the long term.

Despite the challenging conditions, we continue to strengthen our ability, resilience and agility in supporting our stakeholders in these transformational times.

Included in financing and advances are specific business ventures funded by the Restricted Specific Investment Account ("RSIA") arrangement between Islamic Banking and Conventional Bank. The Conventional Bank, being the RSIA depositor, is exposed to the risks and rewards of the business venture and accounts for the expected credit loss ("ECL") allowances arising theron.

As at 30 September 2020, the gross exposure and expected credit loss relating to RSIA financing amounted to RM1,308,167,288 (31 December 2019: RM312,736,235) and RM24,181,485 (31 December 2019: RM21,952,739) respectively.

#### f. Financial Derivatives

Financial derivatives are instruments whose values change in response to the change in one or more "underlying', such as foreign exchange rate, security price and credit index. They include forwards, swaps, futures, options and credit derivatives. In the normal course of business, the Bank customise derivatives to meet specific needs of their customers. The Bank also transact in these derivatives for proprietary trading purposes as well as to manage its assets/liabilities and structural positions. While the Bank also enter into other foreign exchange forward contracts with the intention to reduce the foreign exchange risk of expected sales and purchases for customers, these other contracts are not designated as hedge relationships and are measured at fair value through profit or loss.

The fair value of the derivatives are as follows:
